

SHIVAM JOSHI

Senior Data Analyst | Web & Mobile Analytics

+91 8295599979 | shivamjoshi.joshi9@gmail.com | linkedin.com/in/mrshivamjoshi | Mohali, Punjab

SUMMARY

Google and Adobe Certified Senior Data Analyst with 2+ years of progressive experience across web and mobile analytics implementation. Deep expertise in server-side and client-side GTM, GA4, Adobe Analytics (WebSDK/MobileSDK), Adobe Experience Platform (AEP), and privacy-compliant tracking using Consent Mode v2 and OneTrust. Proven ability to lead end-to-end tracking deployments, architect data layers, build stakeholder-ready dashboards, and manage client engagements.

WORK EXPERIENCE

Growth Natives

Sep 2023 – Present

Senior Data Analyst → Data Analyst → Data Analyst Intern

Google Tag Manager (Client-Side & Server-Side)

- Architected and deployed both client-side and server-side GTM (sGTM) containers; migrated existing tag infrastructure from client-side to server-side to improve data accuracy and page performance
- Configured GA4 event tracking end-to-end via sGTM, including custom event schemas, data layer design, and server-side GA4 client configuration
- Implemented Google Consent Mode v2 via GTM consent triggers, integrating with OneTrust and CookiePro to ensure GDPR-compliant data collection across EU and global client properties
- Built and maintained advanced GTM setups: custom JavaScript/HTML tags, enhanced eCommerce tracking, cross-domain tracking, and systematic QA using GTM preview mode and Omnibug

Google Analytics 4 (GA4)

- Led multiple Universal Analytics to GA4 migration projects: redefined measurement strategies, rebuilt event taxonomies, and ensured continuity of reporting for clients during the transition
- Configured GA4 properties from scratch including data streams, custom dimensions/metrics, and event-based tracking aligned to business KPIs
- Built advanced Explorations — funnel analysis, path analysis, and cohort reports — to surface user behaviour insights and support conversion optimisation decisions
- Developed custom GA4 reports and integrated GA4 audiences for remarketing activation via Google Ads

Adobe Analytics & Adobe Experience Platform (AEP)

- Implemented Adobe Analytics tracking via WebSDK and MobileSDK for web and native mobile apps; configured XDM schemas, data streams, report suites, and conversion/traffic variables
- Worked within Adobe Experience Platform across Data Collection (Edge Network), Schemas & Datasets, Identity stitching (ECID), and Destinations — enabling unified cross-channel customer data flows
- Configured Adobe Consent Framework to align data collection with privacy regulations; ensured compliant data ingestion into AEP pipelines
- Built and analysed reports in Adobe Analytics Workspace including calculated metrics, segments, fallout and flow visualisations, and scheduled dashboards for stakeholders

Privacy, Consent & Compliance

- Delivered full Consent Mode v2 implementations across multiple client properties, integrating Google signals with OneTrust/CookiePro CMPs via GTM consent triggers
- Implemented Adobe Consent Framework for AEP-based clients, ensuring opt-in/opt-out signals propagated correctly across the Adobe Experience Cloud stack
- Designed GDPR-compliant tracking architectures — balancing data collection needs with regulatory requirements — for clients with significant EU user bases

Dashboards & Reporting

- Designed and delivered marketing performance dashboards in Tableau, Power BI, and Looker Studio; connected live backend data sources for automated, always-current reporting
- Built complex calculated fields, blended data sources, and custom visualisations to translate raw analytics data into clear business narratives for non-technical stakeholders
- Conducted Tableau training sessions for client teams to enable self-service analytics and reduce reporting dependencies

Client Management & Leadership

- Served as primary point of contact for multiple concurrent client accounts - gathering requirements, managing delivery timelines, communicating progress, and presenting analytical outcomes
- Supervised and mentored junior analysts and interns: delegated tasks, reviewed implementations, and maintained quality standards across the team
- Promoted twice within 18 months (Intern → Data Analyst → Senior Data Analyst), reflecting consistent delivery and expanded ownership

WNS Global Services

Sep 2022 – Jun 2023

Trainee Analyst

- Conducted data quality assessments across customer and transaction datasets to ensure readiness for downstream analysis
- Identified high-value customer segments through demographic and behavioural attribute analysis
- Built Tableau dashboards and process flow diagrams to present insights in a clear, accessible format for stakeholders
- Translated business requirements into structured analytical tasks and recommended system enhancements to support data-driven decision-making

HighRadius

Jan 2022 – Apr 2022

Trainee

- Gained foundational exposure to enterprise data workflows and financial analytics processes

EDUCATION

MBA - Data Science and Artificial Intelligence

Jan 2025 – Jul 2027

Chitkara University, Punjab

Bachelor of Engineering - Computer Science

Aug 2019 – Aug 2023

Chitkara University, Himachal Pradesh | CGPA: 9.6 / 10

SKILLS

Analytics & Tracking: GA4, Google Tag Manager (Client-Side & Server-Side), Adobe Analytics, Adobe Launch, Adobe Experience Platform (AEP), WebSDK, MobileSDK, Edge Network

Privacy & Consent: Google Consent Mode v2, OneTrust, Cookie-Bot, GTM Consent Triggers, Adobe Consent Framework, GDPR-compliant tracking

Visualisation: Tableau, Power BI, Looker Studio, Adobe Analytics Workspace, Excel

Programming: SQL(basic), JavaScript (intermediate), Python (basic)

Other: Data Layer Design, Tag Auditing, Prompt Engineering, Client Management, Team Leadership

CERTIFICATIONS

- Adobe Certified Professional - Adobe Analytics Developer (Adobe)
- Adobe Certified Expert - Adobe Customer Journey Analytics Developer (Adobe)
- Power BI Data Analyst Associate (Microsoft)
- Google Analytics Certification (Google)
- Tableau Desktop Foundations
